

**DATA SHEET****CINTAFLOX - 100 % PTFE****Composition**

Universal seal tape made of 100% PTFE not sintered.

**Properties**

It is resistant to all chemical products, acids and solvents except alkalis in particular conditions. It is suitable for all metal and plastic threads whichever diameter thanks to its thickness and fast application. In spite of being a plastic it doesn't have got a melt point and it doesn't harden. Ensures a long life perfect tightness. It is inodorous and tasteless.

Applications

Suitable for all threads, It is resistant to : water, gas, air steam, oxygen, chemicals, acid, and solvents.

Technical features

- Density : 0.40 g/cm³
- Maximum service Temperature: 260°C
- Minimum service Temperature : -200°C
- Pressure : 210 Bars
- Elongation: 25%
- Tensile strength : 8 N/mm²

In compliance with norms

- WRAS: Listed and Approved U.K. Water Regulations Advisory Scheme (for use with water up to 85°C)
- UL
- CSA
- FDA (Food and drug administration)
